Annexure - 1

Neutral Grounding Resistance

Design, manufacturing and supply of 433 volts, 750 mA Restricted Neutral System consisting of wire wound resistance, solid state NGR monitoring fail safe relay, Solid state Earth Leakage Relay, Resin Cast Neutral current transformer, power pack unit, Instrumental transformer – 1, Instrumental transformer – 2, buzzer etc with all required accessories within outdoor type floor mounted NGR panel as per DGMS norms.

Suitable for use in 6600 / 433 volts under- ground mines substation.
